12. Domicile State Approval: UnitedHealthcare Insurance Company is domiciled in Connecticut. The Connecticut Department of Insurance does not require these rates to be filed for your state. We file Connecticut specific rates (i.e., rates charged to Connecticut residents) with the Connecticut Department of Insurance. Proposed 2020 Connecticut specific rates will be filed for approval with the Connecticut Department of Insurance in August 2019.

C. Rate Methodology/Assumptions

1. General Method – Projections used in developing the 2020 rates are shown in Attachment 1. Based on the historical claim patterns, per member per month claim costs are developed by benefit and trended to the end of the 2020 rating period. (Also see Attachment 3).

Projected claim costs for 2019 and 2020 are calculated from the grouped experience for plans B through G (for those plans) and plans H through J (for those plans). The remaining plans are based on their own experience and the experience of other AARP Standardized Medicare Supplement Plans.

Rates are based on state of residence as approved by the state of residence. When notification of change of residence is received, rates are adjusted accordingly.

Expense per member per month costs are calculated to reflect the anticipated expenses, risk and profit margin, premium taxes, and marketing expenses.

- 2. Priced with Trend/Selection Claim cost trends are projected for 2019 and 2020. The trend assumptions are based on the historical AARP Medicare Supplement experience and include selection.
- 3. Priced with Rate Increases Rates are calculated to be sufficient through 2020. We anticipate future annual rate increases similar to future medical trend levels for most plans. For some plans future annual rate increases may be different than future medical trends in order to increase or decrease future loss ratios to target levels over time.
- 4. Commission Rate Commissions are no longer paid on the closed 1990 Standardized plans.
- 5. Lapse Assumption Lapse assumptions are based on historical AARP Medicare Supplement experience. For 2019 and 2020, the assumed annual lapse rates (including death) are 7.4% and 7.4%, respectively.
- 6. Morbidity Assumption Morbidity assumptions are based on historical AARP Medicare Supplement experience and are incorporated into the trend projections and base claim costs.
- 7. Interest Assumption -5.0%.
- 8. Pre-Funding These plans are community rated. The rates are projected to be effective until December 31, 2020 and reflect no pre-funding.

D. Scope/Reason for Request

1. Overall increase – The overall increase is 4.9%.

- 2. Variations by Cell The requested rate increases vary by plan. Refer to the enclosed Rate Schedule.
- 3. Effective Date January 1, 2020.
- 4. Timing These plans are rated on a calendar year basis. For 2020, we propose to defer the rate revision until April 1, 2020, and have rates effective through December 31, 2020.

E. Rates and Rating Factors

- 1. Current See Rate Schedule.
- 2. Proposed See Rate Schedule.
- 3. Period Rates Apply Effective January 1, 2020.
- **F.** Average Annualized Premium \$2,921. See Attachment 4 for 2020 annualized premiums by plan.
- **G.** Rate History See Attachment 5.
- **H.** Average Lives See Attachment 6.
- I. Historical Incurred Claims See Attachment 1.
- **J. Historical Earned Premium** See Attachment 1.

K. Loss Ratio Projection

The target lifetime loss ratio for Plans A through J is 75.9% and was filed with the initial policy filing. The target lifetime loss ratio for Plans K and L is 75%.

- 1. Definition Loss ratios are calculated as incurred claims divided by premium.
- 2. Base Period Claim cost projections are based on claim data incurred through 2018.
- 3. Lapse Assumption Lapse assumptions are based on historical AARP Medicare Supplement experience. For 2019 and 2020, the assumed annual lapse rates (including death) are 7.4% and 7.4%, respectively.
- 4. Claim Trend Assumption Claim trend projections are based on historical AARP Medicare Supplement experience and reflect changes made to the Medicare program. See Attachment 3 for projected claim trends.

- 5. Attained Age/Selection Adjustments The loss ratio projections anticipate that increases in claim costs due to aging of current insureds will be offset by continuing enrollment of younger insureds.
- 6. Future Rate Increases We anticipate future annual rate increases similar to future medical trend levels for most plans. For some plans future annual rate increases may be different than future medical trends in order to increase or decrease future loss ratios to target levels over time.
- 7. Interest Assumption -5.0%.
- 8. With and Without Rate Change
 - The anticipated lifetime loss ratio with the rate change implemented on April 1, 2020 is 81%.
 - Without a change to the 2019 rates, the anticipated lifetime loss ratio is 82.8%.

L. Loss Ratio Demonstration

The anticipated lifetime and future loss ratios for these plans are shown in Attachment 1. After proposed rate actions and considering the credibility of the business, the anticipated lifetime loss ratio, future loss ratios and third year loss ratios are greater than or equal to the applicable ratio.

his chart gives you a quick look at the standardized Medigap Plans that can be sold for effective dates up through May 31, 2010 (including Medicare SELECT) and heir benefits. Insurance companies offering Medigap policies must make Plan A available. Not all types of Medigap policies may be available in each state.

Medigap policy covers that percentage of the described benefit. If a column is blank, this means the Medigap policy doesn't cover that benefit. Note: The Medigap policy If a checkmark appears in a column of this chart, this means that the Medigap policy covers 100% of the described benefit. If a column lists a percentage, this means the covers coinsurance only after you have paid the deductible (unless the Medigap policy also covers the deductible).

Through May 31, 2010 the standardized plans are:

Scope and Range of the Rate Increase

2020 rate increases have been proposed for the AARP Standardized Medicare Supplement Insurance Plans for members residing in Rhode Island. These rate actions are projected to apply to 2,634 members. The new monthly premium rates will apply to members beginning April 1, 2020.

The average rate increase for these plans is expected to be 4.9%. Rate increases vary by plan. The range of rate increases is: 4.5% to 5.0%. Additional premium changes may occur due to changes in policyholder discounts.

The proposed rate increase is needed to cover the projected medical and administrative costs for 2020. We will continue to work hard to keep premium rates as low as possible for all members.

Increases in Medical Costs

There are many different health care cost trends that contribute to increases in the Medicare health care spending each year. Some of the key health care cost trends that have affected this year's rate increases include:

- Increasing Cost of Medical Services: Annual increases in reimbursement rates to health care providers.
- Increasing Utilization: The number of office visits and other medical services
 continues to grow. In addition, total health care spending will vary by the intensity of
 care and use of different types of health services.
- Increases in Medicare Deductibles: Medicare deductibles that are covered under these plans are expected to increase.
- Impact of New Technology: Improvements to medical technology and clinical practice lead to more expensive services increasing health care spending.

Administrative Costs

Expected calendar year 2020 administrative costs for these plans are similar to current administrative costs and are not contributing to the proposed rate increase.
